- Maintain consistent lead times, and honor promised delivery dates to the best of our ability
- Maintain clear and open communication with all customers, employees, and manufacturing partners
- Maintain continuous product innovation and improvement

- Listen to the concerns and needs of our customers, employees, and manufacturing partners
- Keep in tune with the changing requirements in the market

We believe that our future success will be determined by our strong personal and corporate commitment to the standards listed above

Environmental Statement

As a manufacturer of soft seating, foam, and upholstery, made of petroleum/oil-based raw materials is a large part of our furniture. We are actively working with innovators and companies to find a high-quality, environmentally friendly, bio-degradable, or recyclable 'foam' product. Environmentally safe upholsteries are available, such as silicon, cotton, flax, and linen. There are also upholsteries available that make use of recycled ocean plastics. Please view our graded in program or speak to our customer service department if you have any questions.

The wood used in the construction of our products is sourced from sustainable tree farms in Canada and the United States. All wood is Forest Stewardship Council (FSC) certified.

Wastage is a large part of the manufacturing process, we attempt to limit what we discard by reusing potential wastage in our product construction. For example, excess upholstery is used as a barrier between the steel spring and foam on the backs of our lounge furniture. This upcycling gives you a more economical and higher quality product.

Our efforts to reduce the environmental impact of our products begin during the design and development phase. Whenever an existing product is changed, or a new one is being developed, we will take into account the environmental impact of the materials chosen; including their origin, use of our products, and end-of-life recovery options. Employing this concept, we give preference to renewable, recycled, recyclable, and biodegradable materials and will also make design considerations to conserve raw materials, water, and energy.

Another unique program that Flexxform offers is our reupholstery program. Often well made, highly-constructed lounge furniture can be reupholstered. This saves hundreds of thousands of tons of waste from ending up in landfills every year. Please speak to our customer service team for details.

Flexxform is committed to a sustainable future for the furniture industry. We are leaders in developing new ways to utilize raw materials sustainably in view of this amazing planet earth we call home, being clean and healthy for generations to come!
